1. What is OMEGA Master Orchestrator?

OMEGA Master Orchestrator is a **reactive high-performance system** for the uncompromising hardening of landing pages, sales copy, and offers. It combines two powerful analysis engines in an interactive web application:

■■ Swarm-Auditor

4 hostile buyer personas (Burned Skeptic, Ruthless CFO, ADHD Scroller, Domain Pedant) tear apart landing pages and offers. Each persona has its own objections, budget limits, and attention spans.

■ Slop-Sanitizer

Deterministic sentence-length burstiness forensics and 40+ regex patterns detect AI clichés and eliminate language monotony. Measures standard deviation of sentence lengths (target: ≥ 5.5).

■ Red-Critic-Gate

Dual gate: Conversion ≥ 92 AND Human Authenticity ≥ 92. Only when both thresholds are met is the copy considered 'hardened'.

Result: Hardened, conversion-optimized copy with ≥ 92 points in both dimensions (Conversion Psychology + Human Authenticity).

2. Features Overview

Cyberpunk Audit Engine

Live terminal with real-time simulation of phases 0-3. 3 pipeline modes: /omega-audit (Master Combo), /swarm-audit (Focus Group), /slop-sanitize (Text Forensics). Quick-start presets for B2B SaaS, Performance Agency, D2C E-Commerce, High-Ticket Coach.

Lead Capture & CRM

Landing page for free initial audits. Local lead management with one-click audit start. Stores leads in browser (localStorage).

Dossier Comparison (Side-by-Side)

Direct comparison of two audits with delta calculation. Shows conversion delta, slop delta, burstiness delta.

Invoice Generator

Selection of 5 standard audit packages (950 € Pre-Launch, 2,400 € Full-Funnel, 490 € Retainer). Automatic 19% VAT calculation. Print and PDF export.

Case-Study Portfolio

Showcase of previous audits with before/after metrics. Exportable as HTML.

Lead Hunter Batch Engine

Queue for multiple target URLs and mass auditing. Parallel processing.

PWA (Progressive Web App)

Installable as desktop app. Offline-capable. Service Worker with precaching.

Slop-Scraper v3

Automatic website scraping. 40+ slop patterns (DE+EN). Parallel processing (4+ workers). Open Graph, CTA detection, SSL check, mobile check. HTML report with dashboard.

Auto-Discovery Engine

Automatically finds suitable websites. 15+ sources: GitHub, npm, PyPI, Hacker News, WordPress, Shopify, Medium, Vercel/Netlify.

3. Architecture & Tech Stack

File Structure:

```
omega-master-orchestrator/
■■■ src/
■   ■■■ App.tsx                    # Main app (Routing, State)
■   ■■■ main.tsx                   # React Entry Point
■   ■■■ components/                # 18 React components
■   ■   ■■■ Header.tsx             # Navigation
■   ■   ■■■ ScraperView.tsx        # Slop-Scraper UI
■   ■   ■■■ LeadHunterView.tsx     # Batch Lead Processing
■   ■   ■■■ InvoiceGeneratorView.tsx # Invoice Generator

```

Tech Stack:

Category	Technology	Version
Frontend	React	19.x
Build Tool	Vite	6.x
Styling	Tailwind CSS	4.x
Language	TypeScript	5.x
Icons	Lucide React	latest
Desktop	Electron	optional
PWA	vite-plugin-pwa	latest
Utilities	clsx, tailwind-merge	latest

4. Installation & Setup

Prerequisites:

- Node.js 20+ (recommended: 22 LTS)
- npm 10+
- Git
- Optional: Python 3.10+ (for legacy scripts)
- Optional: Rust + Cargo (for Tauri desktop build)

Step-by-Step:

1. Clone repository: git clone https://github.com/mrmixx-max/omega-master-orchestrator
2. Change directory: cd omega-master-orchestrator
3. Install dependencies: npm install
4. Start dev server: npm run dev
5. Open browser: http://localhost:3000
6. Production build: npm run build
7. Preview: npm run preview

Desktop App (Electron):

- npm install electron --save-dev
- npm run electron:start

Windows Launcher:

- Run Launch_OMEGA_Windows.bat
- Opens OMEGA in Edge/Chrome as standalone app

5. Usage: Audit Engine

Pipeline Modes:

Mode	Description	Use Case
/omega-audit	Master Combo (Swarm + Slop)	Full audit
/swarm-audit	Focus Group (4 Personas)	Conversion analysis
/slop-sanitize	Text Forensics (Slop Scan)	Copy optimization

4 Buyer Personas:

■ Burned Skeptic

Has had bad experiences. Distrusts promises. Checks evidence.

■ Ruthless CFO

Only numbers count. ROI, costs, break-even. No emotions.

■ ADHD Scroller

3 seconds of attention. If not immediately clear, gone. Mobile-first.

■ Domain Pedant

Knows the industry. Spots buzzwords. Checks technical details.

Quick-Start Presets:

- B2B SaaS
- Performance Agency
- D2C E-Commerce
- High-Ticket Coach

6. Usage: Slop-Sanitizer

The Slop-Sanitizer detects AI-generated text patterns (GPT clichés) and measures burstiness (sentence length dynamics). Target: ≥ 92 points Human Authenticity.

40+ Slop Patterns (DE + EN):

- "In today's fast-paced world"
- "Delve into"
- "Tapestry"
- "Seamless"
- "Game-Changer"
- "Unlock the potential"
- "It is important to note"
- "Robust solution"
- "Empower"
- "Leverage"
- "Synergy"
- "Paradigm shift"
- "Holistic approach"
- "Deep dive"
- "Move the needle"
- "Think outside the box"
- "At the end of the day"

Burstiness Measurement:

Standard deviation of sentence lengths (words per sentence) ÷ Average sentence length × 10. Target value: ≥ 5.5. Low burstiness = monotone sentence structure = AI-suspicious.

Scoring:

Score	Rating	Action
92-100	Hardened	Ready for production
70-91	Improvable	Rewrite recommended
40-69	Slop-heavy	Fundamental revision needed
0-39	AI-generated	Complete rewrite required

7. Usage: Lead Hunter

The Lead Hunter processes CSV lists of target URLs and runs the complete OMEGA pipeline (Audit + Slop Scan) for each lead.

CSV Format:

```
url,niche,name,company,style,objections
```

Example:

```
https://example.com,B2B SaaS,John Doe,Acme Inc,Sharp,Price
```

Output:

- Executive HTML dossiers per lead
- Outreach queue (emails)
- Prioritized lead list (score 0-100)
- JSON + CSV export

8. Usage: Invoice Generator

5 Standard Audit Packages:

Package	Price (net)	Description
Pre-Launch Audit	950 €	Conversion audit before launch
Full-Funnel Audit	2,400 €	Complete funnel audit
Retainer (monthly)	490 €	Monthly retainer
Slop-Sanitization	350 €	Copy optimization
Full Pipeline	2,400+ €	Audit + Scraper + Hunter

Features:

- Automatic 19% VAT calculation
- Print and PDF export
- Customer data input
- Line items with quantities and prices

9. Portfolio & Lead Capture

Portfolio Generator:

- Showcase of previous audits
- Before/after metrics
- Exportable as HTML
- Cyberpunk design

Lead Capture Form:

- Landing page for free initial audits
- Cyberpunk design
- Local storage (localStorage)
- One-click audit start

10. Desktop App

Option 1: Electron

- npm install electron --save-dev
- npm run electron:start
- Native desktop window with menu bar

Option 2: PyWebView (Python)

- pip install pywebview
- python omega_desktop_v3.py
- PyInstaller .exe (35 MB, no Python needed)

Option 3: Windows Launcher (Edge/Chrome)

- Run Launch_OMEGA_Windows.bat
- Opens OMEGA in Edge/Chrome as standalone app
- No installation needed

11. Monetization: 4 Business Models

Model 1: Conversion-Audit Service (350-950 €)

Scrape the customer's website → Analyze for slop and conversion issues → Create HTML report with specific recommendations → Offer rewrite service (+500-2,000 €)

Model 2: Slop-Scraper-as-a-Service (490-2,400 €)

Offer the scraper as a service → Find leads for customers (automatically) → Generate personalized emails → Monthly retainer for lead updates (200-500 €/mo)

Model 3: Full Pipeline (2,400+ €)

Audit + Scraper + Hunter + Desktop App → Complete lead generation system → Training and setup included → Premium support (500 €/mo)

Model 4: Open-Source + Premium (Freemium)

Base system free on GitHub → Premium features (extended patterns, custom reports, API) as paid add-on → Community support free, priority support paid

ROI Calculation (Model 2):

Metric	Value
Setup costs	0 € (Open Source)
First 10 leads	2 hours of work
Average lead value	500-2,000 €
ROI	2,500-10,000% in the first week

12. Case Studies & ROI

Case Study: 47 Leads in 2 Hours

Starting point: A freelancer was looking for companies with poor website copy.

Process:

- Auto-Discovery: 47 URLs automatically found (GitHub, npm, PyPI, HN, WordPress, Shopify)
- Slop Scraper v3: All 47 URLs scraped in 2 minutes (parallel, 4 workers)
- Analysis: 31 of 47 websites had slop toxicity > 30%
- Lead Scoring: 12 high-priority leads (score ≥ 60)
- Email Generation: 12 personalized sales emails automatically created

Result:

Metric	Value
Qualified leads	12 in 2 hours
Response rate	4 replies (33%)
Contracts	2 (Conversion Audit + Slop Sanitization)
Revenue	1,400 € in the first week

13. Troubleshooting

Problem	Solution
npm install fails	Use npm install --legacy-peer-deps
Build fails	Check tsc --noEmit, then vite build
PWA not installable	HTTPS required (localhost works)
Electron won't start	npm install electron --save-dev
TypeScript errors	npm run typecheck for details
Port 3000 in use	npm run dev -- --port 3001

14. Roadmap & Community

Roadmap:

- v3.1: API backend (FastAPI) for lead persistence
- v3.2: Multi-user support with authentication
- v3.3: Extended slop patterns (50+)
- v3.4: A/B testing for copy variants
- v4.0: Cloud sync (optional) for multi-device
